**ABOUT TEQ**

Founded nearly thirty years ago as TekPackaging, TEQ is dedicated to being the leader of quality manufacturing in the thermoforming industry. TEQ's commitment to continuous improvement, design capability and process control gives the company the ability to serve customers better than anyone else.

TEQ is a subsidiary of ESCO Technologies, a leading supplier of filtration products to the Process, Health Care, and Transportation markets worldwide. The company also markets proprietary, special purpose communication systems as well as a broad range of RF shielding and test products.

From design and engineering, through to state of the art technology, and attentive and informed customer service, TEQ ensures that every aspect of every project is completed with the kind of precision that has made us the preferred choice of many clients.
